

# Family Engagement Program

*Train your Parent and Family Team Members to deliver this research-based program*

The **Family Engagement Program** is a family-centered, trauma-informed intervention designed to engage the parents/guardians of RY and CAST Program youth.

Through **four parent group sessions**, parents learn skills to support their students in mood management, drug-use control, and improving school performance.

A research-based program, Family Engagement outlines the important combination of **speaking up, listening, expressing feelings, building self-esteem, and offering needed support**.

This strength-based model can **substantially boost the outcomes of your RY or CAST Program**, by instilling support in the home environment for all the hard work the teens are doing in group.

## Family Engagement Training for Facilitators

*Join us for a 4-hour live online advanced training to learn how to implement this long-awaited partner program to Reconnecting Youth & CAST!*

This training will teach Family Engagement Facilitators to:

- Recruit parents and guardians to the Family Engagement group meetings.
- Conduct meetings in person or virtually with these important adults.
- Utilize numerous program resources, including activity worksheets, slides, and meeting evaluation forms.
- Instill hope and confidence in the families of RY and CAST teens.

**\$500/participant** (10% off for groups of 5+)

**Includes curriculum & materials**
